

Magic Eye Lighting

The Magic Eye lighting processors unique design enables you the flexibility in the design of your lighting control.

Setting the interior and exterior lights for your home can be achieved by simply pressing a single button on your remote control.

System Features

Intelligent one touch simple operation

Incorporates 3 x lighting circuits for low voltage applications 12/24
- AC&DC (expandable up to 12 lighting circuits)
Program up to 4 x scenes per circuit

Use the control method of your choice (control via infra-red or RS232 or even momentary contact switches)

Soft start bulb protection

Inbuilt noise suppression (eliminates hi-fi interference / humming)

Control via infra-red or RS232

Internal & external IR receiver (link to your existing IR Repeater or plug receiver directly in)

It's easy to complement activities with the appropriate lighting. Different lighting levels (scenes) can be pre-set for viewing television, entertaining, reading etc.

All lights can be precisely controlled, individually or collectively, at the touch of a button - fade out all the lights in the home with one touch.

LED version available

Program via PC serial port interface or IR Code Learning (simple to use terminal software provided)

2 x controlled relay outputs (timer adjustable for controlling blinds etc / expandable up to 8 relay circuits)
